Induction Cooktops

Perfectly consistent results from start-to-finish. Induction technology is faster, more precise, and easier to clean than electric or gas.

Precise Temperature Control

Create a perfect berry reduction or slow-simmered marinara without scorching with our Precise Temperature Control function. Unlike other induction cooktops, our technology uses a sensor to continuously measure pan temperature and automatically adjusts the heat to ensure your pan maintains the temperature you set from start to finish.

Power Slide

Boil, sear or sauté on the front burner and when you're finished, simply slide the pan to the back burner and the cooktop will automatically adjust to keep food warm and ready to serve.

Bridge Feature

Expand your culinary horizons to specialty foods like crepes and paninis that allows you to connect two cooking elements for even heat even when using larger pans or griddles.
